

CopperSmith

Our tables are crafted by artisans from around the world and are expertly designed to withstand everyday use. However, as even the best-made furnishings and décor are not indestructible, normal wear and tear will reflect use and care.

Artisan-crafted furnishings made from metal, stone and natural wood with hand-applied finishes may vary in color, pattern, shape, and texture, making each truly unique.

Finishes may change over time, and natural wood may display small splits, knots, joint lines, or other features that will add character to your piece without affecting its quality or performance.

Furniture made from natural wood may move slightly as temperature and humidity cause the wood to expand and contract. This is normal and should be expected from season to season.

Occasionally dust lacquered wood surfaces with a soft, dry cloth and non-wax furniture polish to keep finishes looking their best.

Wash our metal surfaces with soap and water. Optional metal wax may be applied.

For best results, follow use instructions for all cleaning products carefully. Do not over apply. To prevent moisture damage (like water rings), wipe up spills immediately with a soft, dry, undyed cloth.

Do not clean using abrasives, harsh, corrosive chemicals, or care products containing ammonia or silicone, as these could damage finishes and surfaces.

When assembling new wood furnishings, avoid over tightening hardware as this could cause cracking.

Never place hot dishes directly on wood surfaces as this could cause scorching. Similarly, prolonged use of hot electrical equipment may also cause scorching.

Protect surfaces from incidental marks (like scratching, scorching, and water marks) by using coasters, trivets, felt pads, and non-plastic mats.

Lift wood furniture when moving. Do not drag, as this could loosen joinery and damage your piece.

Avoid using table pedestals as footrests.
